Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 through 11 and 30 through 37, drawn to a heat recovery arrangement, classified in class 165, subclass 246+.
 - II. Claims 12 through 23, drawn to a method of recovering heat energy, classified in class 165, subclass 47+.
2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process that is Invention II as claimed can, for example, be practiced using an apparatus which, unlike the apparatus that is Invention I as claimed, lacks a heat recovery or heat transfer device that is distinct from the air flow paths, and which merely comprises a plurality of ducts disposed in a mutual heat transfer relationship to each other.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and because the searches required for Group I is not required for Group II and vice versa, restriction for examination purposes as indicated is proper.

Art Unit: 3743

4. Claim 24 links inventions I and II, and will thus be examined regardless of which of these two inventions is elected by applicant. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claims, claim 24. Upon the allowance of the linking claim 24, the restriction requirement as to the linked inventions shall be withdrawn and any claims depending from or otherwise including all the limitations of the allowable linking claims will be entitled to examination in the instant application. Applicants are advised that if any such claims depending from or including all the limitations of the allowable linking claims is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ljiljana (Lil) V. Ciric, whose telephone number is (703) 308-3925.
